

Practical Question Bank –

1. Write 5 test cases for a Login page.
2. Write 5 positive test cases for a Registration page.
3. Write 5 negative test cases for a Login page.
4. Write test cases for a Payment module.
5. Write test cases for Username and Password validation.
6. Write test cases for Forgot Password functionality.
7. Write test cases for Logout functionality.
8. Write test cases for a Student Registration System.
9. Write test cases for an Online Shopping System.
10. Write test cases for Add to Cart functionality.
11. Write test cases for Search functionality.
12. Write test cases for Online Payment functionality.
13. Write test cases for Change Password functionality.
14. Write test cases for Email/Phone Number validation.
15. Write test cases for OTP verification.
16. Write positive and negative test cases for a Login module.
17. Write test cases for empty input fields in a Registration form.
18. Write test cases for valid and invalid email addresses.
19. Write test cases for password length validation.
20. Write test cases for date-of-birth validation.
21. BVA / Equivalence Partitioning
22. Apply Boundary Value Analysis for Age field: 18–60.
23. Apply Boundary Value Analysis for Marks field: 0–100.
24. Apply Boundary Value Analysis for Password length: 8–16 characters.
25. Apply Boundary Value Analysis for Username length: 5–15 characters.
26. Apply Equivalence Partitioning for Age: 18–60.
27. Apply Equivalence Partitioning for Marks: 0–100.
28. Apply Equivalence Partitioning for Password length: 8–16 characters.
29. Apply BVA and Equivalence Partitioning for a Registration form.
30. Bug / Defect Based
31. Identify the defect from a given situation and write a bug report.
32. Write a bug report for: Correct username and password entered, but Login button does not work.

33. Write a bug report for: Payment deducted but order status shows Failed.
34. Write a bug report for: Registration form accepts an invalid email address.
35. Write a bug report for: Password field accepts fewer than 8 characters.
36. Assign Severity and Priority to given defects.
37. Test Execution Based
38. Prepare a test case table with Test Case ID, Test Steps, Expected Result, Actual Result and Status.
39. Execute given test cases on paper and mark them as Pass/Fail based on the given Actual Result.
40. Prepare a Test Execution Summary from given Pass/Fail test results.
41. Identify which test cases have Passed, Failed, or Blocked status.
42. Testing Technique Based
43. Write test cases using Black-Box Testing for a Login module.
44. Write test cases using White-Box Testing for a simple login validation logic.
45. Write Integration Test Cases for Login → Dashboard.
46. Write Integration Test Cases for Cart → Payment.
47. Write System Test Cases for an Online Shopping System.
48. Identify suitable testing techniques for given software scenarios.
49. Regression / Automation Based
50. Write 5 regression test cases for a Login module after a software change.
51. Identify which test cases are suitable for automation.
52. Write test cases for a multi-page Registration process.
53. Write test cases for browser navigation.
54. Write test cases for web form validation.
55. Write test cases for authentication validation.
